

POLAR 10 & 12

GOOD BETTER BASS

You want more low bass and even more sound pressure on the dance floor? Upgrade your POLAR setup with the SONAR 115 Sub D and get the party started!

Setup:

Set up POLAR as a stereo system and place a SONAR 115 Sub D between the POLAR system.

Recommended settings for a stereo setup of POLAR 10 or POLAR 12 with a SONAR 115 Sub D. With this setting, the system plays very balanced and at the same volume. For even more bass emphasis, just raise the volume of the SONAR Sub.

Settings:

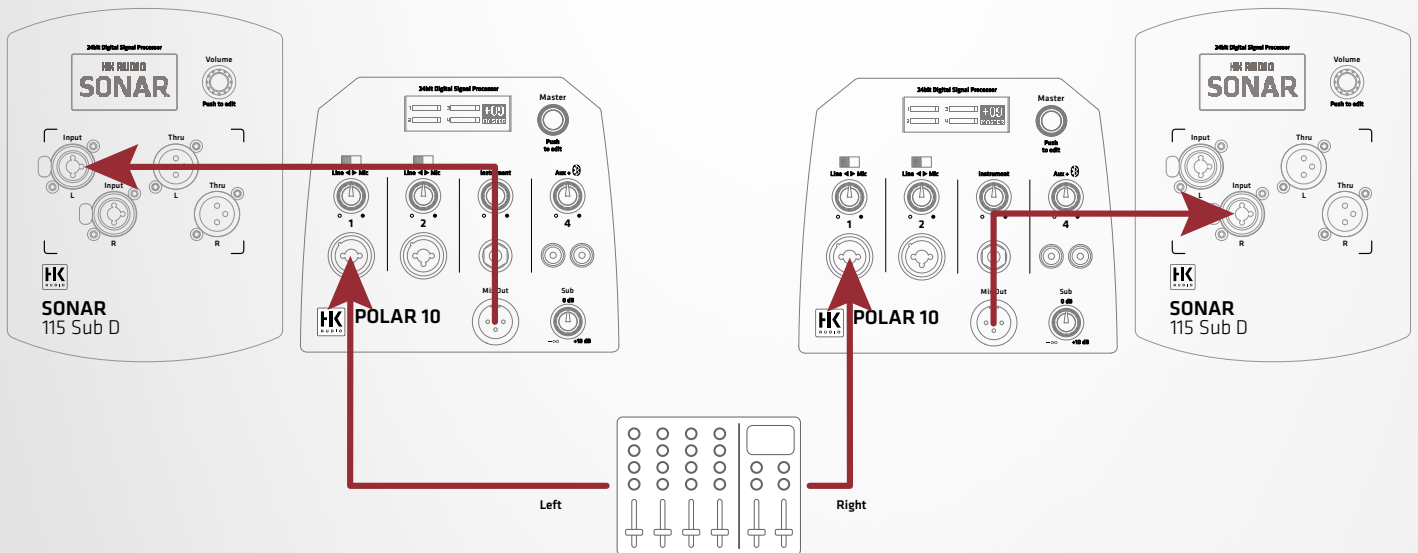

POLAR 10/12 :

Preset Music, Master 0 dB, CH1 Line, same Gain setting for the POLAR systems, Sub Level 0 dB, Low EQ -3 dB

SONAR 115 Sub D:

X-Over SONAR, Polarity Normal, Volume -12 dB

Sub extension for POLAR 10 & POLAR 12 with two SONAR 115 Sub D

Setup:

Set up the POLAR as a stereo system and place one SONAR 115 Sub D flush next to the POLAR system on the outside.

Advantage: With this cabling, the volume of the SONAR 115 Sub D adjusts automatically when the master of the POLAR system is changed.

Recommended settings for a stereo setup of POLAR 10 or POLAR 12 with two SONAR 115 Sub D. With this setting, the system plays very

balanced and at the same volume. For even more bass emphasis, just raise the volume of the SONAR Sub.

Settings:

POLAR 10/12 :

Preset Music, Master 0 dB, CH1 Line, same Gain setting for the POLAR systems, Sub Level 0 dB, Low EQ -3 dB

SONAR 115 Sub D:

X-Over SONAR, Polarity Normal, Volume -12 dB
